Subject: OA thoughts

Hi Dan,

I think two areas that local organizations could participate in would be filling the data gaps and reducing local inputs. For the purposes of listing, we lack *in situ* data, in State waters, for which we have WQS. Local organizations could provide support for the collection of data in their local waters, either moorings with sensitive pH meters, or the collection/study of populations such as pteropods.

I'm not sure if this is actually what you were looking for. I'm around all week, and totally open tomorrow, if you want to talk about it. Thanks.

jill
